

REACH Policy Statement.

The intent of this policy is to clarify to the best of our ability the status of Dynamic Metals Limited's position concerning the EC Regulation 1907/2006 and Annex XV11 to uncoated metallic products concerning registration, evaluation, authorization and restriction of chemicals (REACH). Our interpretation of this regulation requires us to conduct a review of all our products and register the chemicals under REACH. Our interpretation of this regulation also distinguishes between the following titles of Substances, Preparations and Articles which are captured within REACH.

Dynamic Metals Ltd provide raw material and semi-finished products such as Titanium, Nickel, Cobalt-based alloys, Stainless & Specialist steels in all forms including Sheet, Plate, Billet, Bar, Tube and forgings and these are classified as articles.

In conclusion Dynamic Metals Ltd confirm that products supplied are classified as "Articles" and these articles have no intended release as outlined in the European Chemical Agency's guidance and therefore do not need to be registered under REACH Regulations. Registration of products is conducted by either the European manufacturer or by the organization importing the product into the E.U. provided it meets the registration criteria.
